Client

Royal Australian Navy / Tenix Pty Ltd

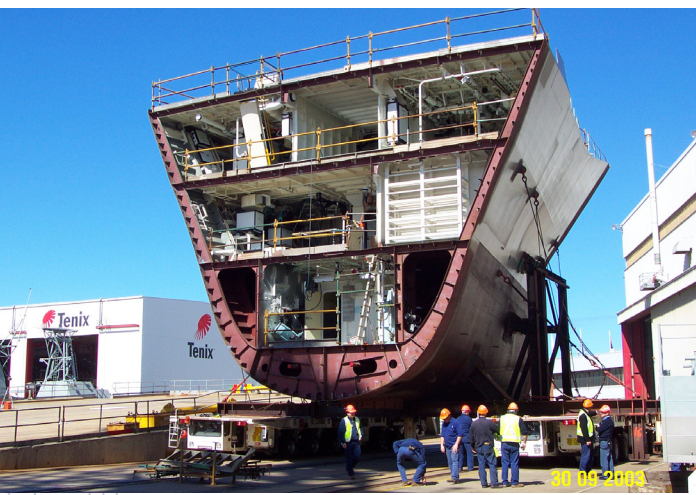

Location

Melbourne, VIC, Australia

Scope

- Abrasive blasting and painting
- Thermal insulation
- Sheet metal work and furniture
- Reinforced plastic composites, design, supply and install
- Ship services

ANZAC FRIGATE PROJECT

Project Details

Works have included a wide range of activities including:

- Blasting/painting and decorative finishing
- Thermal insulation ductwork and ships pipework
- Design and fabrication of composite structures
- Sheet metal work and ships furniture

Execution of works on this major project site required close management and co-operation of all work groups including Navy, Client and Contractor.

Variable resource requirements and a wide range of work trades has driven supervision and management to develop extensive knowledge of many shipbuilding activities. This included definition of scopes, planning, working with other trades and cost control.
